(54) SUNSHADE DEVICE OF SUNROOF

(57) Abstract:

PROBLEM TO BE SOLVED: To improve attaching workability of a sunshade as well as to easily and reliably perform the engagement of a sliding tool in relation to a guide rail.

SOLUTION: A sliding tool 37 is supported on a sunshade plate arranged on a roof opening of a vehicle body so as to be moved to the using position (a) to be approached to a guide rail 9 provided along a roof opening and elastically engaged with it, and the attaching position to be retreated from the using position (a) and in which elastic bouncing force is decreased in relation to the guide rail 9. In the using position, the sliding tool 37 is fixed and supported by a lock means 45.
